# Nunavik Building:

## The Solution for Northern Construction

Building in the North comes with its share of challenges, from the extreme climate to high costs, as well as delays and logistical difficulties. It's to overcome these obstacles that Nunavik Building modular buildings were designed. More than just a simple construction, they represent a robust, efficient, and durable solution specifically tailored for northern environments.

### **Unparalleled Speed and Flexibility**

Unlike traditional construction, our modules are manufactured in a factory, which allows us to have better control over quality and costs. Once delivered to their final destination, the modules are assembled on-site in just a few days. This approach significantly reduces construction timelines and site disruption. Our adaptive modular concept offers the flexibility to create structures for residential, commercial, government, or municipal projects.

### **Designed for Robustness and Durability**

Nunavik Building structures are designed to withstand the harshest climates. Their frame is composed of industrial-grade heavy and light steel, which gives them exceptional durability. Additionally, they are delivered with a ground-level structure onto which the modules are placed, eliminating the need for complex foundations. The modules rest on steel skids, which allows them to be moved as needed and provides a secure base, whether the ground is frozen or not. This design simplifies installation and guarantees long-term stability.

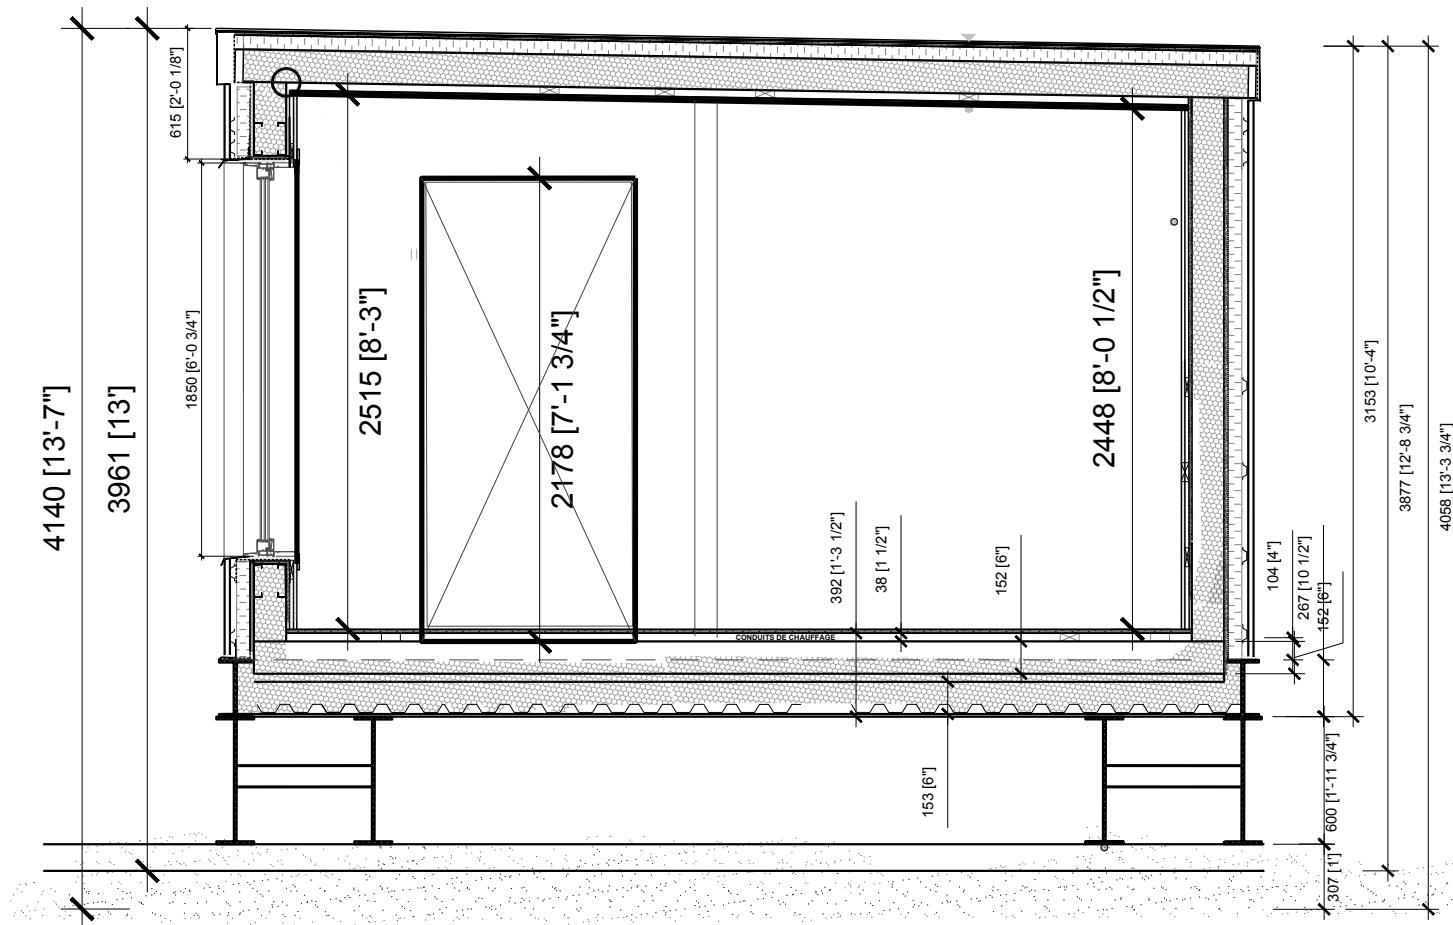

### **Superior Comfort and Energy Efficiency**

Each building features superior insulation and simplified, yet extremely robust, building mechanics. This technical choice ensures above-average energy performance, thereby reducing heating costs and the ecological footprint. For optimal comfort, we integrate a radiant heating system into the floors, providing uniform and pleasant warmth.

Choosing a Nunavik Building is opting for peace of mind, performance, and a durable investment over time.

# Cross-Section of Our Buildings

# Composition & RSI Values

## ROOF / CEILINGS

- EFFECTIVE RSI: 8.20
- DARK GREY PVC MEMBRANE, SECURED ACCORDING TO CSA OR FM STANDARD (REF. ENG.)
- 5/8" STRUCTURAL OSB PANELS
- SOPREMA 2.5" SOPRA ISO V PLUS PANELS
- 152 mm (6") BAILEY TYPE STUD (REF. STRUCTURAL ENG.)
- CAVITIES FILLED WITH AIRMÉTIC SOYA HFO (5.5")
- DC 315 (URETHANE FOAM PROTECTION)
- 2x4" SPF FURRING
- FINISHING WOOD - PINE

- AIRMÉTIC SOYA HFO SPRAYED URETHANE (100 mm - 4 in.), \*152mm (6") ABOVE OPENINGS AND ROOF JUNCTION
- 16mm (5/8") GYPSUM - TAPED
- WOOD FURRING (1" X 3") @16" OC
- 3/4" (19mm) VERTICAL FINISHING WOOD - TONGUE AND GROOVE (PREFINISHED WHITE STAIN)

## WALL TYPE MI

- EFFECTIVE RSI: 5.05
- ENAMELED STEEL SHEETING
- IDEAL ROOFING 24 GA - AMERICANA PROFILE, SECURED ACCORDING TO CSA OR FM STANDARD (REF. ENG.)
- 7/8" HORIZONTAL BAILEY FURRING @16" OC
- SOPREMA 2.5" SOPRA-ISO V PLUS RSI LT 2.49
- SOPREMA SOPRASEAL STICK VP MEMBRANE
- 5/8" SECUROCK GYPSUM
- 152 mm (6") BAILEY TYPE STUD (REF. STRUCTURAL ENG.)

## FLOOR ABOVE GROUND

- EFFECTIVE RSI: 7.46
- VINYL TYLE FLOORING
- 2mm UNIFORM CONCRETE LAYER
- 16mm OSB SUB-FLOOR
- WOODEN WALL DIVISIONS
- GLYCOL HEATING CONDUITS
- 11 mm OSB PANELS
- FLOOR STRUCTURE: STEEL STUDS (REF. ENG.)
- AIRMÉTIC SOYA HFO SPRAYED-URETHANE (200@250 mm - 8-10 in.)
- 2 X 4 FURRING (THERMAL BREAK)
- STEEL STRUCTURE (REF. ENG.)
- WELDED STEEL DECKING
- "I" STEEL SUPPORT RAILS

# Warranty Statement

**This Warranty Statement applies exclusively to the evolutive modular buildings constructed by Nunavik Building. It is divided into two levels of coverage.**

## **Five (5) Year Limited Warranty**

This first level of warranty covers the initial quality of the construction as well as the entire structure of the module(s) that compose the evolutive modular building, including:

Floors

Walls

Roof

Waterproofing

## **Two (2) Year Limited Warranty**

This second level of warranty covers all appliances and equipment within the modular building's mechanical room.

## **Limitations**

Both levels of this warranty are valid only for the normal use of the building and its equipment. Use deemed inadequate or abusive may lead to the partial or complete cancellation of the warranty. Normal wear and tear of appliances and accessories is not covered. Furthermore, Nunavik Building is not responsible for damages resulting from ground movement.

## **Final Provisions**

**A Warranty Certificate, reflecting the conditions listed above, will be issued for each home sold at the time of property transfer.**
